

Student Engagement/Experience Survey

Historical Results Report

Oxford School District

Fall 2022

In the summer of 2022, Studer Education refreshed our survey items to better measure the key survey constructs and to focus on the individual's experience of their organization. This redesign allowed us to maintain similar items that are aligned to prior, historical items, and to add additional items for gathering important feedback.

This Historical Results Report provides the 2022-2023 results of the items that align to prior items in our surveys and includes ***an overall mean for those items that is most closely compared to the prior historical mean***. Since the historical and current items are not an exact match, we encourage you to carefully consider the trend over time and be alert to how the change in language may have impacted this year's results. Changes in the overall mean may have occurred as a result of the shift in item language. This report contains the original survey items to serve as individual, historic tables. Your automated report consists of only refreshed items and a new, overall mean derived from items 1-20. We believe that you may find value in viewing trends over time but, again, caution you to stay alert to the change in survey item language as you draw conclusions from the 2022-2023 results.
